

**Webinar Opportunity**  
**Planning to Protect: Helping Southeast Communities**  
**Think about Climate Change and Adaptation**  
**Featuring Dr. Lynne Carter from Louisiana State University**  
**Thursday, January 28<sup>th</sup> 2010 from Noon until 1:00 pm EST**

The science behind climate change and its implications for our southeastern coasts are clear. While mitigating the emissions responsible for climate change is key to solving the climate crisis, coastal communities must be prepared to adapt to the changing conditions that will ultimately be unavoidable. It is more important than ever for local communities to be informed and engaged on coastal climate preparedness.

Please join Southern Alliance for Clean Energy (SACE) and ICLEI: Local Governments for Sustainability on January 28<sup>th</sup> for the launch of our monthly webinar series focused on all issues surrounding coastal climate adaptation in the Southeast U.S.

Our guest speaker, Dr. Lynne Carter, is the Associate Director of the Southern Climate Impacts Planning Programs at Louisiana State University. Dr. Carter also directs the Adaptation Network a non-profit organization that focuses on building climate resilient communities. For our first webinar in this series, Dr. Carter will provide an overview of what adaptation means for coastal communities, what issues they will face and what decision-makers and stakeholders must consider. She will be available for questions and an open discussion following her presentation.

**Please join us on January 28<sup>th</sup> 2010 from  
Noon until 1pm EST for this unique opportunity.**

**Upcoming webinar topics in this series include:**

- February 2010 (TBD): Local Government Adaptation Processes and Planning with Mr. Harvey Ruvin (Miami-Dade Climate Advisory Task Force)
- March 2010 (TBD): Synergies between Mitigation and Adaptation with Missy Stults (ICLEI) and Ulla-Britt Reeves (SACE)
- Fresh Water Resource Adaptation
- Policy Tools (and Barriers) for Coastal Adaptation
- U.S. Adaptation Funds in Climate Legislation
- Coastal Natural Resource Adaptation
- Adaptation to Stronger Storms and Hurricanes
- The Economics of Adaptation
- The Role of Insurance and Re-Insurance Companies in Adaptation
- Coastal Adaptation Projects Underway in the Southeast
- International Coastal Adaptation
